Getting Ahead of Cyberthreats, with AI

The traditional security controls are becoming inadequate. The defenders are challenged with enhancing their visibility and insights into their own organizations' systems in order to regain control over attackers. [Darktrace is an AI based Cyber Defense platform](#), which enables custom solutions that evolve to counter the ever-changing threats.

Introduction to Industry 4.0

The 4th Industrial revolution based on Cyber Physical Systems was the topic of TEPEE in late 2018. Joe Cannella, CIO of Tempel Steel, presented and led the discussions on the topic. Here is a brief follow-up interview to obtain his [views on Industry 4.0](#). For the uninitiated, Industry 4.0 is represented by three major components: Digitization and Integration of vertical and horizontal value chains, Digitization of product and service offerings, and Digital business models and customer access. All enabled by data and analytics as core capabilities.
